

Amendments to the Drawings

Please amend the drawings by replacing sheets 1-11 with the replacement sheets 1-8 filed herewith. In addition to reorganizing the figures in a more orderly manner and reducing the number of sheets, the replacement sheets include the following changes:

- A) Replacement Sheet 2, FIG. 3: The dashes in front of "114 bits" and in front of "240 milliseconds" near the middle of FIG. 3 are changed to ~ to designate "approximately". These are obvious typographical errors. There is support in the specification at page 11, lines 30-32.
- B) Replacement Sheet 5, FIG. 9: "THAT" is changed to "WHETHER" in block 910. This is supported in the specification at page 17, lines 26-29.
- C) Replacement Sheet 6, FIG. 11: The connector entering from the top of the figure is changed to go only to the input of the decision block 1105; it no longer is merged with the "NO" results from blocks 1105 and 1110. This is supported in the specification at page 19, lines 1-14.
- D) Replacement Sheet 7, FIG. 14: 1405 is changed to 1400. 1405 is a duplicate reference number. The detailed description is changed to correspond (see Amendments to the Specification).
- E) Replacement Sheet 7, FIG. 15 and Replacement Sheet 8, FIG. 16: The dots that occur in each of the two plots are changes to more clearly distinguish which points belong to which plot.
